## WORK EXPERIENCE

### Web Developer Aratech

02/2022 - Present

Achievements/Tasks

- Creating engaging, responsive websites and web applications with HTML, CSS and JavaScript boosting user engagement by 30% through streamlined design.
- Successfully integrated RESTful APIs, collaborating with back-end developers and designers to enhance project functionality, resulting in a 20% faster development cycle.
- Successfully collaborated with a Dubai-based team to deliver projects four major projects ahead of schedule, enhancing client satisfaction and streamlining workflow.
- Designed and developed engaging interactive UIs using React and Bootstrap user engagement by 30% on a key project.
- Enhanced web performance by implementing image optimization and code minification, resulting in a 30% reduction in load times and improved user engagement.
- Supervised version control for multiple projects using **Git** and **GitHub**, enhancing collaboration among 5+ team members.
- Optimized web performance through image optimization and code minification.

## EDUCATION

### Bachelor of informatics engineering , Software Engineering Tishreen University

2016 - 2021

Latakia, Syria

## SKILLS

HTML5

CSS3 + SASS/SCSS

JavaScript (ES6+)

React.js

Laravel

SQL

MySQL

Bootstrap

Tailwind CSS

jQuery

PHP

AJAX

JSON

Figma/Adobe XD (UI/UX Collaboration)

Strapi

Nova

## PROJECTS

### GIFIS

- **GIFIS** is a dynamic web platform that supports government efforts to enhance industrial safety. It is developed using **Laravel** for backend operations and **Strapi** as a headless **CMS** to manage content and form submissions efficiently.

### Mareeb Real Estate

- **Mareeb Real Estate** is a real estate website I worked on as a **freelance frontend developer**. The project was built using **Laravel** on the backend, while I handled the **frontend design and development**. I focused on creating a **responsive user interface** that allows visitors to easily browse and filter property listings across all devices.

### ATM screen (ALIZZ Bank) and (OAB Bank)

- I develop custom **ATM screen interfaces** that feature secure **login systems**, **virtual keyboards**, and smooth **user interaction flows**. These screens are designed for **touchscreen functionality**, allowing users to input their PIN or other information securely using an on-screen keyboard. The system handles **authentication**, error messaging, and user guidance, ensuring both **security** and **ease of use** for everyday banking operations.

### DriftX

- **DriftX** is a dynamic web platform developed using **Laravel** and **Nova**, designed to manage and showcase content related to motorsport events and media. It includes features like media galleries, event schedules, and partner showcases, providing a seamless experience for both administrators and users.

### ALMASREF

- **AL MASRAF** is a dynamic web platform developed using **Laravel** and **Nova**, designed to provide world-class banking and trade finance services in the Gulf region.
